Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

This office action is in response to the election, received 11/20/03, in which applicant elected group I, claims 1-6 and 14-19, without traverse.

Claims 1-6 and 14-19 are pending.

Information Disclosure Statement

The information disclosure statement, received 1/18/02, is acknowledged. A signed copy is included hereto.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1, 4-6 and 14-19 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1, 5-6, and 14-19 recite a delta-sleep inducing peptide or biologically active fragments and derivatives thereof, this is vague and indefinite for failing to specify the metes and bounds of the biologically active fragments and derivatives.

Art Unit: 1654

Claim 4 recites the compound in conjunction with another anesthetic agent, this is vague and indefinite for failing to identify the other anesthetic agent.

All other cited claims depend directly or indirectly from rejected claims and are, therefore, also rejected under 35 U.S.C. 112, second paragraph for reasons set forth above.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-6 and 14-19 are rejected under 35 U.S.C. 102(b) as being anticipated by Schoenberger, USPN 4,165,312.

The instant invention is drawn to a use of delta-sleep inducing peptide for the manufacture of a medicament for regulating, promoting or inducing anesthesia; and for promoting or inducing sedation.

Schoenberger teaches a nonapeptide, formula 1, which has a 100% query match with the delta-sleep inducing peptide of the instant invention, see abstract. Schoenberger discloses the compound is useful in pharmaceutical compositions as sleep inducing agents, see abstract. Therefore, the reference is deemed to anticipate the instant claims above.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-6 and 14-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Schoenberger, USPN 4,165,312.

The reference is relied upon for the reasons discussed *supra*.

Based upon the beneficial overall teachings provided by Schoenberger with respect to a use of the delta-sleep inducing peptide, if not expressly taught, it would have been obvious to one of ordinary skill in the art at the time the claimed invention was made to adjust particular conventional working conditions therein (e.g., the use of delta-sleep inducing peptide or biologically active fragments and derivatives for the manufacture of a medicament for regulating, promoting or inducing anesthesia; and for promoting or inducing sedation)- i.e., the adjustment of particular conventional working conditions is deemed merely a matter of judicious selection and routine optimization which is well within the purview of the skilled artisan.

From the teaching of the reference, it is apparent that one of ordinary skill in the art would have had reasonable expectation of success in producing the claimed invention. Therefore, the invention as a whole was *prima facie* obvious to one of ordinary skill in the art at the time the

Art Unit: 1654

invention was made, as evidenced by the reference, especially in the absence of evidence to the contrary.

Conclusion

All claims are rejected.
